

OpenCTI Professional Support

Product Summary

Filigran’s OpenCTI Standard Support subscription provides organizations with professional assistance along their deployment, maintenance and usage of the platform. It ensures them guaranteed response time and prioritization of their requests and questions.

☆ Standard Technical Support

- Ticketing system
- 8/5 support coverage (business hours)
- 48 hours response times
- Security notifications
- Unlimited questions and issues
- 2 health checks per year
- 1 architecture & integration workshop per year

◆ Diamond Technical Support

- Ticketing system & Phone Number
- 8/5 support coverage (business hours)
- 24 hours response times
- Security notifications
- Unlimited questions and issues
- 4 health checks per year
- 2 architecture & integration workshop per year

Severity Level	Standard Response Time	Diamond Response Time
Severity-3: low issue	48 hours	32 hours
Severity-2: medium issue	48 hours	32 hours
Severity-1: major issue	32 hours	24 hours

What is a health check?

Filigran has developed private tools to collect and analyse platform configurations, metrics and high level KPIs (not the data). After launching this tool, the engineering team is able to provide guidance to administrators in order to enhance stability and performances.

What is a workshop?

Filigran Technical Account Managers handle support requests and are also able to assist organizations in the deployment and configuration of the platform to cover their use cases and ensure a proper integration with their cybersecurity ecosystem.
