### ◆ Premium Technical Support

- Ticketing system & Phone Number
- 24/7 support coverage
- 12 hours response times
- Urgent issue 2 hours SLA
- Security notifications
- Unlimited questions and issues
- 4 health checks per year
- 2 architecture & integration workshops per year

| Severity Level           | Standard Response Time | Premium Response Time |
|--------------------------|------------------------|-----------------------|
| Severity-3: low issue    | 24 hours               | 12 hours              |
| Severity-2: medium issue | 24 hours               | 12 hours              |
| Severity-1: major issue  | 4 hours                | 2 hours               |

### What is a health check?

Filigran has developed private tools to collect and analyze platform configurations, metrics and high level KPIs (not the data). After launching this tool, the engineering team is able to provide guidance to administrators in order to enhance stability and performances.

### What is a workshop?

Filigran Technical Account Managers handle support requests and are also able to assist organizations in the deployment and configuration of the platform to cover their use cases and ensure a proper integration with their cybersecurity ecosystem.
